Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: The proposed amendment which describes that the form is stored in advance and then accessed by the user based on access rights appears to overcome the Joshi reference. Although Joshi describes an identity profile and authorization to access the resource and the use of remote procedure call he doesn't appear to mention the advanced storage of instruction forms. The following invention allows the user to access a predefined form containing instructions for faxing, printing or scanning. All Responses are subjected to further search and consideration. .
